Professional Summary

ERP Functional Consultant and Business Operations Professional with hands-on experience in Microsoft Dynamics 365 Business Central (D365 BC), ERPNext, and end-to-end ERP implementation. Skilled in Business Analysis, Requirement Gathering, BRD/FRD, UAT, Go-Live, Hypercare, Master Data Management (MDM), MIS Reporting, and Business Process Improvement. Experienced in Microsoft 365 Administration, Microsoft Entra ID (Azure Active Directory), IT Operations, System Administration, and Hardware & Software Support. Proficient in SQL, Microsoft Excel, Power BI, HTML, CSS, JavaScript and MySQL. Passionate about delivering scalable ERP solutions, optimizing business processes, and supporting digital transformation initiatives.

Professional Experience

ERP Functional Consultant, ECS Business Software solutions 04/2026 – 06/2026 | Bengaluru

- Executed ERP business operations across P2P, O2C, Finance, Inventory, CRM, Sales, and HRMS through functional testing, issue analysis, user support, and business process validation.
- Performed ERP configuration validation, integration support, functional testing, and L1 functional support to ensure seamless ERP operations and issue resolution.
- Maintained and governed Master Data Management (MDM) by creating, validating, updating, and uploading customer, vendor, item, pricing, employee, and payroll master records, ensuring data accuracy for ERP transactions and migration.
- Performed customer opening balance validation, payroll and pricing data verification, Accounts Payable (AP) support, journal entry processing, ERP data upload validation, and data discrepancy resolution.

ERP Functional Analyst | Microsoft Dynamics Administrator 02/2025 – 10/2025 | Bengaluru
Nandhana Foods Pvt Ltd

Project: Microsoft D365 Business Central End-to-End ERP Implementation (2 Brands | 55+ Branches)

- Multi-brand F&B organization supporting restaurants, cloud kitchens, central kitchen, central warehouse, retail operations, and corporate departments.
- Contributed to the end-to-end Microsoft Dynamics 365 Business Central ERP implementation lifecycle, including requirement gathering, AS-IS/TO-BE process analysis, BRD/FRD documentation, ERP configuration validation, UAT, Go-Live, Hypercare, and post-implementation support across 55+ branches.
 - Gathered business requirements from Finance, Procurement, Inventory, Production, and Operations teams, documented functional requirements, validated business processes, and collaborated with consultants during ERP implementation.
 - Executed 300+ UAT scenarios, validated ERP configurations, identified functional defects, coordinated issue resolution, and ensured successful Go-Live readiness.
 - Administered Microsoft Dynamics 365 Business Central, Microsoft 365, and Microsoft Entra ID (Azure Active Directory) by managing Identity & Access Management (IAM), RBAC, user provisioning, access reviews, licensing, branch-level permissions, and Segregation of Duties (SoD).
 - Maintained and governed 500+ customer, vendor, item, pricing, employee, branch, and inventory master records, performing data validation, migration support, data cleansing, and governance to ensure master data quality.
 - Supported business operations across Finance, Procurement (P2P), Sales (O2C), Inventory, CRM, and HRMS by resolving functional issues, validating business transactions, delivering user training, and standardizing ERP workflows.
 - Performed ERP-to-POS revenue reconciliation across multiple sales channels, prepared daily, weekly, and monthly MIS reports, analyzed operational data, and generated business insights to support management decisions.
 - Delivered post-Go-Live L1/L2 functional support, resolved user issues, coordinated with cross-functional stakeholders, and ensured business continuity across multiple branches.
